

Planet or Plastic?

May 14, 2023

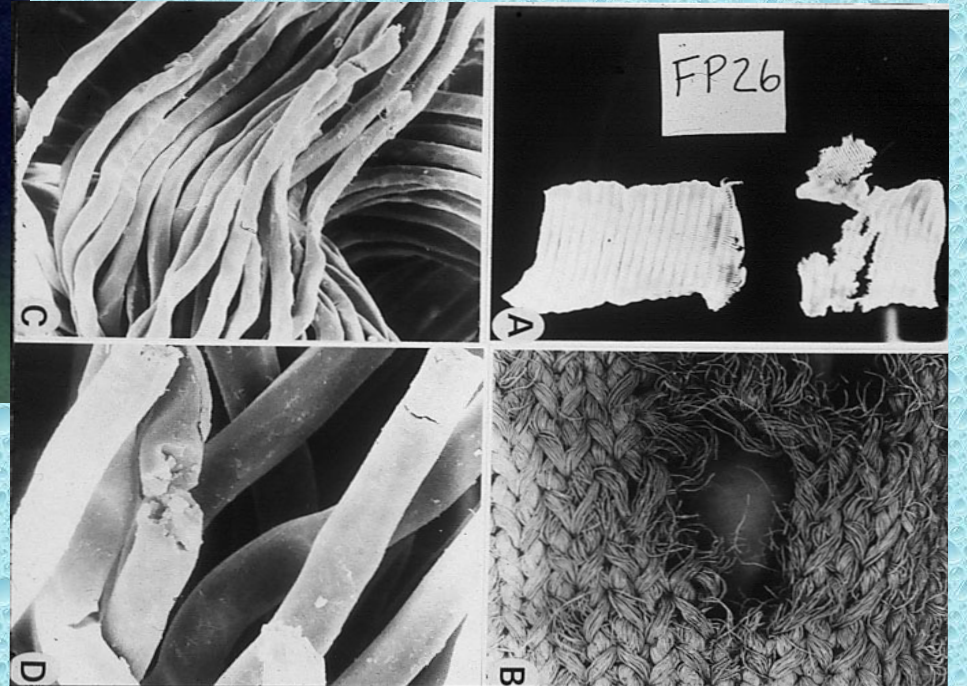

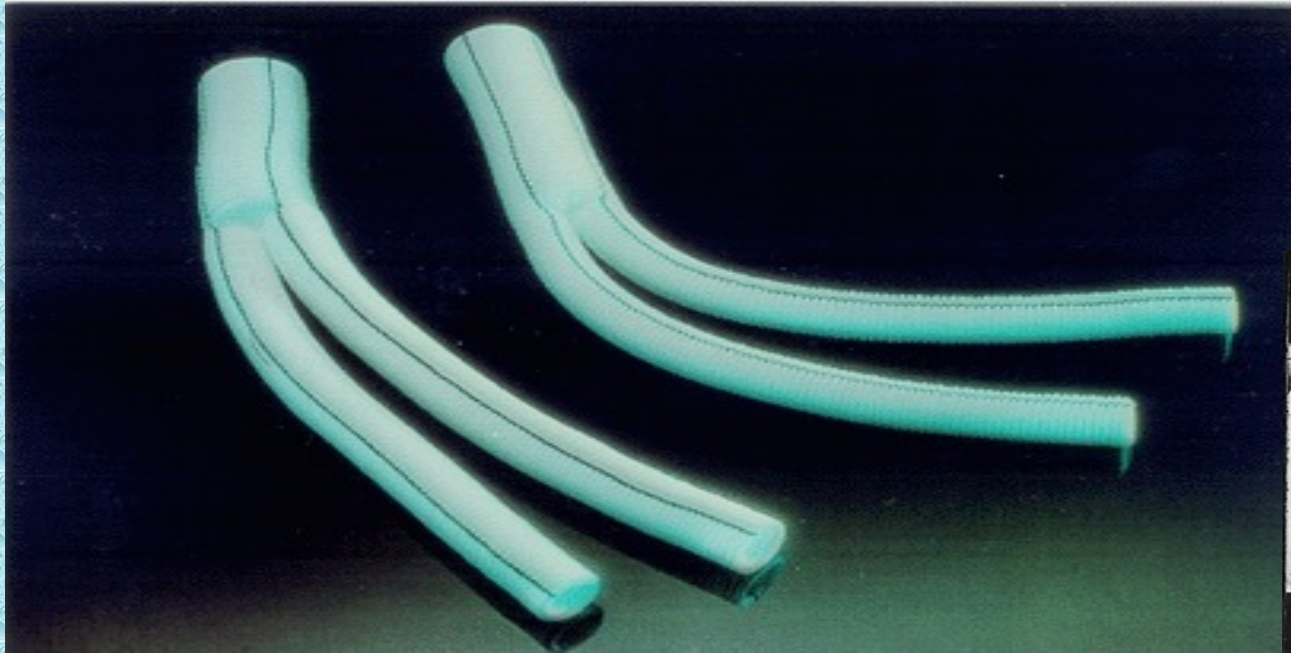

PLASTICS
LAND TO SEA

My Previous Career

Plastics Breaking Down in the Body

Why is this important?

Why a career change?

Billions of pounds of plastic can be found in swirling convergences that make up about 40% of the world's ocean surfaces.

At current rates plastics is expected to outweigh all the fish in the sea by 2050.

Proactive vs. Reactive

Reactive (Now):

- Finding ways to harvest and use the plastic
- Finding ways to create a circular economy

Proactive (Now):

- Reduce and eliminate certain plastics
- Alternative “plastics”

Let's work together to save our oceans!
